

### BeamWell FPS Features:

- ➔ True DC Output (means a more Stable Emission can be achieved);
- ➔ Compact and Light-Weight Form Factor (3U / half rack);
- ➔ Up to 70 Amps Capability !;
- ➔ Primary Switched Design;
- ➔ Oversized Transformer;
- ➔ Rock-Solid Design with Oversized components in general;
- ➔ Plug-and-Play Replacement for other FPS from major manufacturers;
- ➔ Stand-alone and Rack-mountable;

The BeamWell Filament Power Supply (FPS) offers the best features and technology available on the market. It was built aiming for unbeatable reliability and best performance. Our FPS offers both. Carefull design and oversized components (including the 5KW capable transformer core) led to an outstanding product.

The BeamWell is a light-weight yet rock-solid performer. It proved it's qualities and will continue to do so for a long time.

Our commitment to uncompromised performance led us to design and build custom cables for High Voltage, including high-current and low-current versions. The High-Current, Filament Cable, includes Gold-Plated and Steel Spring Loaded Connectors compatible with industry standard HV Feed-Through.

Contact us for information on how you can evaluate or watch in action one of our Power Supplies at a select partner location near you.
